# CHANTAL THOMASS & SELECTIVE LINE

« What I enjoyed about designing bottles was the chance to explore something I'd never done before! I believe it's interesting to take risks, try something new.

The advantage of not being completely aware of the technicalities is that it gives you more design freedom and enables you at times to go beyond the boundaries of creativity. »

### INSPIRATIONS & CHALLENGES

« Glass is a very inspiring material. I've always loved glass; I even have a collection of glassware from all periods of history, different bottle shapes... I think no one wants to throw away a pretty bottle, most prefer to keep it and use it again as a kind of decoration. »

« The challenge for Selective Line's Collection
was to start with a relatively simple shape then play
with the finishing touches, molding patterns here
and there either onto or into the glass...
With so many ideas each model has a very different look,
despite being the same shape in the beginning. »

« THE KEY MESSAGES I TRY TO COMMUNICATE
THROUGH MY DESIGNS ARE FEMININITY, BEAUTY,
STYLE AND FREEDOM » CHANTAL THOMASS
